To whom it may concern,

I am writing to express my interest in the role of Engineer I in the Lane Change program. I learned about the position Through emails promoting the new program.

Currently, my work as a Team Lead has me managing a brand new team specialized in researching state laws & compliances in relation to vehicle registration and creating resources for our Registration Team in order to ensure their success. I was tasked with creating this team and I was given an overall goal. With this in mind, I conducted all the interviews and created a passionate team who were enthusiastic to help establish this new team.

In addition, I manage and prioritize various projects within my team ensuring any top priority projects are completed within given deadlines. I facilitate communications between my team and various other departments and any stakeholders; arranging meetings with these departments to discuss collaborations on projects. I also communicate with outside Vendors and Partners to assist with escalated accounts and provide resolutions to the proper parties.

I'm confident the skills I've acquired in my current role will translate to an new role. I learn things very quickly and thrive in environments that are fast-paced and just a bit hectic. I look forward to hearing from you to further discuss the position.

Thank you for your Consideration.

Sincerely,
Gabriela Trompisto Cabrera
